FOR
RETT SYNDROME
AWARENESS MONTH

Rett Syndrome Awareness Activity

The goal of our activity book is to help young school aged children feel apart of Rett syndrome Awareness Month.

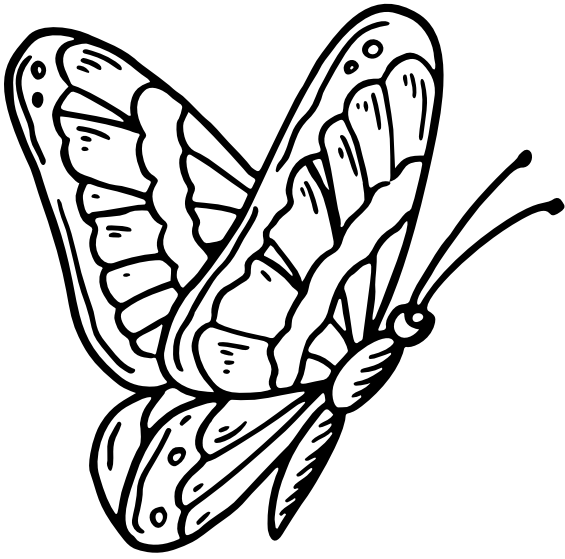

This book is made up of different style butterflies. We are all unique. Not every person with Rett Syndrome is the same either. Each page can be divided into 4 butterflies. Of course, if two children get the same design, the way they colour them will make it different.

Once complete, it would be a great visual to show community and help spread awareness around your school.

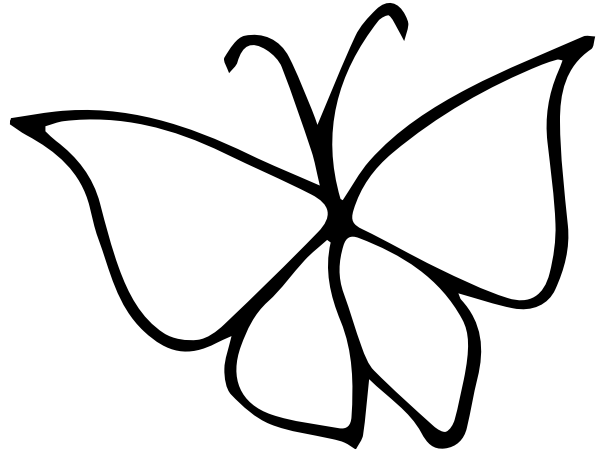

The colour for Rett Syndrome Awareness is purple.
