POUR
SYNDROME DE RETT
MOIS DE LA SENSIBILISATION

Activité de sensibilisation au syndrome de Rett

Le but de notre livre d'activités est d'aider les jeunes enfants d'âge scolaire à se sentir à part du mois de la sensibilisation au syndrome de Rett.

Ce livre est composé de papillons de styles différents. Nous sommes tous uniques. Toutes les personnes atteintes du syndrome de Rett ne sont pas les mêmes non plus. Chaque page peut être divisée en 4 papillons. Bien sûr, si deux enfants obtiennent le même design, la façon dont ils les colorent le rendra différent.

Une fois terminé, ce serait un excellent visuel pour montrer la communauté et aider à faire connaître votre école.

La couleur de la sensibilisation au syndrome de Rett est le violet.

Merci de partager vos photos de votre jardin
